## 1. SpeedScore

SpeedScore is a full-stack web application designed to help speed golfers record their stats, manage friends, and access a feed mode. The app features Google authentication for user login and implements accessibility standards to ensure compliance and improve usability for a wider range of users. Additionally, the badge system that depends on the golfer's stats adds a gamification element to the app. As a member of the development team, I helped implement key features and worked to ensure the app's performance and reliability.

A full-stack web application for speed golfers to record stats, manage friends, and access a feed mode. Implemented Google authentication for user login and used accessibility standards to ensure compliance and improve app usability.

Designed and developed a badge system that depends on the golfer's stats to incentivize engagement and improve user retention.

Collaborated with a team of developers to ensure code quality, maintainability, and scalability.

[GitHub](#)[Link](#)[My Contribution](#)

In all, SpeedScore is a showcase of my technical skills in React, JavaScript, HTML, CSS, Express.js, Node.js, MongoDB, and my ability to collaborate with a team towards a common goal.

Featherdusters LLC is a multi-page, mobile-first website that I built, maintained, and refactored for a local business.

As the sole front-end developer, I collaborated with the business owners to gather requirements and create a website that met their needs. I also implemented

accessibility standards to ensure compliance and improve the app's usability for a wider range of users. Through my contributions to the website's development, Featherdusters LLC now has an online presence that reflects their brand and values.

- Multi-page, mobile-first website built, maintained, and refactored for a local business
- Led front-end development and collaborated with business owners to gather requirements and create a website that met their needs
- Implemented accessibility standards to ensure compliance and improve app usability for a wider range of users
- Improved website performance through testing, debugging, and optimization

Overall, this project showcases my skills in front-end development and collaboration, and highlights my ability to create effective digital solutions for businesses.

**Thank you for taking the time to review my portfolio. I am excited about the opportunity to contribute my skills to a dynamic team as a full stack developer. I am always open to collaborating on exciting projects and exploring new opportunities.**
